

TEST SCHEDULE CASTALIA_STAT080BIS		SOLVING	BEAM PROBLEM	SOL.SAR.STAT080BIS
FINITE ELEMENT			SOLVER	CLEVER (SARGON ©)

Problem description:

Fixed frame with shear force

Keywords (english): validation, benchmark, statics, finite elements, fem, solver, precision, reliability, quality control, beam, error measure

Keywords (italian): validazione, benchmark, statica, elementi finiti, fem, solutore, precisione, affidabilità, controllo qualità, travi, misura di errore

Editorial note:

Target values are based on theoretical values, cross check values or accepted values. Where "theoretical" values are used, target values have been computed using well known formulae and/or published results.

Note:

Shear area is not used, that is shear energy neglected. D_{xi} and D_{zi} are the offsets from lower Z alignment leftmost available node.

Cv	computed value
T _v	target value
T _{vk}	target value kind (theoretical, cross check, accepted).
Th	theoretical value
Cr	cross check value (theoretical target value is not known, results obtained with a different program are used as target values).
Ac	accepted value (a value which, on the basis of some argument, can be considered acceptable).

100(T_v - Cv) / Cv relative error percentage
